20 Kim, Laura and Molly share £385

The ratio of the amount of money Kim gets to the amount of money Molly gets is 2 : 5
Kim gets £105 less than Molly gets.

What percentage of the £385 does Laura get?

105 ÷ (5 − 2) = 35.

1 mark
Use 3-unit difference

Kim = £70; Molly = £175.

Laura = £385 − £70 − £175 = £140.

1 mark
Find Laura's £140

140 ÷ 385 × 100 = 36.3636...%.

1 mark
Part ÷ whole × 100

Laura gets approximately 36.4%.
