14 The table below shows some information about the number of times each student in a class was late last week.

Lates	Frequency
0	15
1	8
2	3
3	3
4	1

Lates × frequency

0 × 15 = 0

1 × 8 = 8

2 × 3 = 6

3 × 3 = 9

4 × 1 = 4

Work out the mean number of lates per student.

Total lates = 0 + 8 + 6 + 9 + 4 = 27.

1 mark
Multiply, then sum

Students = 15 + 8 + 3 + 3 + 1 = 30.

Mean = total lates ÷ number of students.

1 mark
27 ÷ 30

= 27 ÷ 30 = 0.9 lates per student.

1 mark
0.9

(Total for Question 14 is 3 marks)
