17 The numbers 1, 2, 4, 7, 8, 9, 10, 11 and 12 are put into a Venn diagram.

1 mark
3 in Q only

1 mark
6 in overlap

The number 3 is in set Q but not in set P.
The number 6 is in both set P and set Q.

(a) Complete the Venn diagram.

(2)

A student chooses at random a number in the completed Venn diagram.

(b) Write down the probability that this number is **not** in Set Q.

Not in Q: 1, 2, 4, 7, 8, 10, 11 — 7 numbers.

1 mark
Count suitable and all outcomes

There are11 numbers altogether.

$P(\text{not } Q) = \frac{7}{11}$

1 mark
7/11

(2)

(Total for Question 17 is 4 marks)
