7 On Monday Alex earned £120
She worked for 8 hours.

(a) Work out Alex's hourly rate of pay.

120 ÷ 8 = £15 per hour.

1 mark
Pay ÷ hours

1 mark
£15

£ .....

(2)

On Monday Alex earned £120
On Tuesday she earned £100

Alex earned the same amount of money on Wednesday, on Thursday and on Friday.

She earned a total of £550 for these five days.

(b) How much did Alex earn on Wednesday?

Monday + Tuesday = £120 + £100 = £220.

1 mark
£550 – £220

Three equal days: £550 – £220 = £330.

1 mark
Divide by3

Wednesday = £330 ÷ 3 = £110.

1 mark
£110
