10 Here are three rectangles.

The area of rectangle **B** is 10% greater than the area of rectangle **A**.
The area of rectangle **C** is 10% greater than the area of rectangle **B**.

By what percentage is the area of rectangle **C** greater than the area of rectangle **A**?

Take area A as100 units.

Area B = 100 × 1.10 = 110 units.

1 mark
First10% increase

Area C = 110 × 1.10 = 121 units.

1 mark
Second10% increase

Increase from A = 121 – 100 = 21%.

1 mark
21%

..... %

(Total for Question 10 is 3 marks)
