3 The perimeter of a square has the same length as the perimeter of this triangle.

All measurements are in centimetres.

Find an expression, in terms of x, for the length of a side of the square.
Give your answer in its simplest form.

Triangle perimeter = (2x + 3) + (5x – 2) + (5x + 3)

1 mark
Add all three sides

= (2 + 5 + 5)x + (3 – 2 + 3)

= 12x + 4.

1 mark
Simplify then divide by4

One side of the square = (12x + 4) ÷ 4

= 3x + 1 cm.

1 mark
3x+1 cm

(Total for Question 3 is 3 marks)
