29 Find an equation of the straight line with gradient 3 that passes through point A.

A = (2,5); gradient m=3.

$y = 3x + c$

1 mark
Use y=3x+c

$5 = 3 \times 2 + c$

$c = -1$

1 mark
y=3x−1

$y = 3x - 1$

(Total for Question 29 is 2 marks)
