1 A fair ordinary dice is thrown.

(a) On the probability scale below, mark with a cross (×), the probability that the dice will land on an even number.

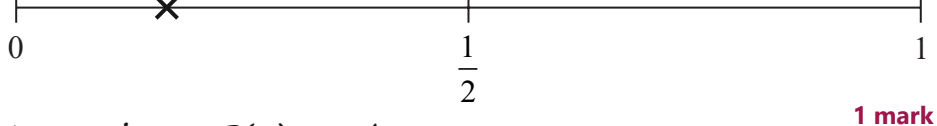

Even outcomes: 2,4,6, soP(even) = 3/6 = 1/2.

1 mark
Cross at1/2

(1)

(b) On the probability scale below, mark with a cross (×), the probability that the dice will land on a 5

One outcome is5, soP(5) = 1/6.

1 mark
Cross at1/6

(1)

(Total for Question 1 is 2 marks)
