12 A rule to change a UK shoe size to a European shoe size is

multiply the UK shoe size by 1.25 and then add 32

European shoe sizes are given as whole numbers.

Katie's UK shoe size is 5

(a) Work out Katie's European shoe size.

$5 \times 1.25 + 32 = 38.25.$

European size38 (nearest whole number).

(2)

Gustav's European shoe size is 42

(b) Work out Gustav's UK shoe size.

$1.25x + 32 = 42$

$-32 \qquad -32$

$1.25x = 10$

$\div 1.25 \qquad \div 1.25$

UK size8.
