25 Linda recorded the temperature, in °C, at 9 am on each of 30 days.

The table shows information about her results.

Temperature (T °C)	Number of days
$10 < T \leqslant 12$	3
$12 < T \leqslant 14$	8
$14 < T \leqslant 16$	14
$16 < T \leqslant 18$	4
$18 < T \leqslant 20$	1

Calculate an estimate for the mean temperature.
Give your answer correct to 1 decimal place.

Midpoint	Frequency	Product
11	3	33
13	8	104
15	14	210
17	4	68
19	1	19

1 mark
Midpoint × frequency

Total products = 33 + 104 + 210 + 68 + 19 = 434.

1 mark
Sum products ÷30

Estimated mean = 434 ÷ 30 = 14.4666... ≈ 14.5°C.

1 mark
14.5°C to1dp

..... °C

(Total for Question 25 is 3 marks)
