17 A factory makes ice cream tubs in two sizes, small and large.

small

large

The tubs are similar in shape.

The height of the small tub is 5 cm

The volume of the small tub is 150 cm^3
The volume of the large tub is 500 cm^3

Work out the height of the large tub.
Give your answer correct to 3 significant figures.

1 mark
Cube root volume ratio

Small	Large
150	500

Volume scale = 500 ÷ 150 = 10/3.

Length scale = cube root(10/3).

1 mark
7.47cm to3sf

Height = 5 × cube root(10/3) = 7.4690079... ≈7.47cm.

..... cm

(Total for Question 17 is 2 marks)
