8 Make t the subject of $p = \sqrt{a + \frac{t}{2}}$

$p^2 = a + t \div 2$

$-a$ $-a$

$p^2 - a = t \div 2$

$\times 2$ $\times 2$

$2(p^2 - a) = t$

$t = 2(p^2 - a)$

1 mark
Square both sides

1 mark
Isolate term in t

1 mark
$t=2(p^2-a)$

(Total for Question 8 is 3 marks)
