15 (a) Work out $\dfrac{4.36 + 2.8^3}{6.8 - 5.42}$

Give your answer as a decimal.
Write down all the digits on your calculator display.

$2.8^3 = 21.952$; $4.36 + 21.952 = 26.312$.

$6.8 - 5.42 = 1.38$.

$26.312 \div 1.38 = 19.06666667$
