6 The table gives the height of each of five buildings in England.

Building	Height (m)
Heron Tower	230
CIS Tower	118
Tower 42	183
The Shard	310
Leadenhall	225

Fran says,

"The Heron Tower is more than twice as high as the CIS Tower."

Fran is wrong.
Explain why.

1 mark

Twice CIS = 2×118 = 236m.

230 <2×118

Heron is230m, which is less than236m.

(Total for Question 6 is 1 mark)
