27 (a) Factorise $m^2 - 9$

$m^2 - 9 = (m - 3)(m + 3)$

1 mark
Difference of two squares.

(1)

(b) Expand and simplify $(x + 3)(2x - 5)$

	$2x$	-5
x	$2x^2$	$-5x$
3	$6x$	-15

$2x^2 - 5x + 6x - 15$

$= 2x^2 + x - 15$

1 mark
Multiply all four pairs.

1 mark
Collect like terms.

(2)

(Total for Question 27 is 3 marks)
