11 The incomplete table and the incomplete box plot give information about the number of lorries using a bridge each day last January.

	Number of lorries
Least number	20
Lower quartile	170
Median	200
Upper quartile	280
Greatest number	405

1 mark
Read the three statistics.

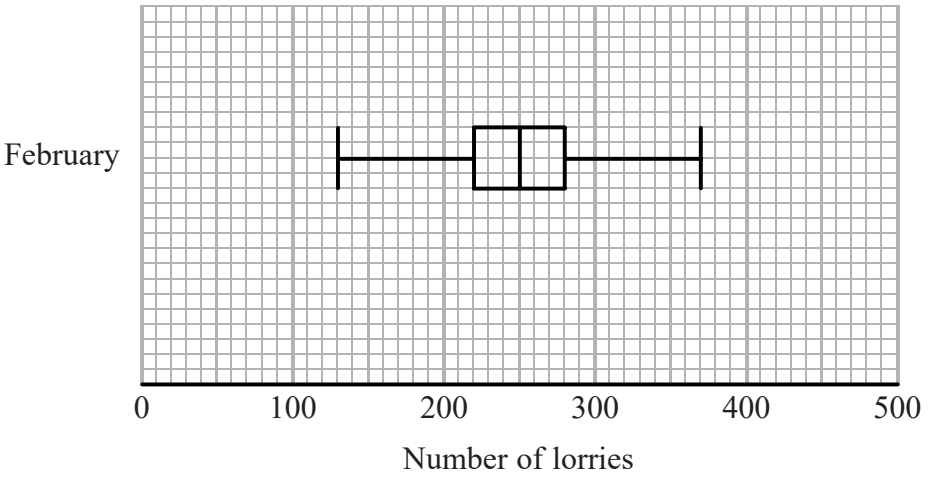

1 mark
Upper quartile 280; maximum 405.

(a) (i) Use the information in the table to complete the box plot.

(ii) Use the information in the box plot to complete the table.

(2)

The box plot below gives information about the number of lorries using the bridge each day last February.

(b) Compare the distribution of the number of lorries using the bridge last January and the distribution of the number of lorries using the bridge last February.

February median 250 > January 200: usually 50 more lorries.

IQR: January 280 – 170 = 110; February 280 – 220 = 60.

January had more variation in the daily number of lorries.

2 marks total
Compare median and IQR in context.

(2)

(Total for Question 11 is 4 marks)
