11 There are 320 students in a school.
There are 36 more boys than girls.

What fraction of the students in the school are boys?

Girls: $(320 - 36) \div 2 = 142$

1 mark
Remove extra 36 then halve.

Boys: $142 + 36 = 178$

1 mark
Add 36 for the boys.

Fraction boys = $\frac{178}{320} = \frac{89}{160}$

1 mark
178 out of 320.

.....

(Total for Question 11 is 3 marks)
