14 A jar contains sugar.

The jar and the sugar have a total weight of 850 g.

Anna uses $\frac{2}{3}$ of the sugar.

The jar and the sugar now have a total weight of 530 g.

Work out the weight of the jar.

Used sugar = 850 − 530 = 320 g

1 mark
Find sugar removed.

1 mark
320 g is two thirds.

Thirds	g
2	320
3	480

×1.5 ×1.5

Total sugar = 480 g

Jar = 850 − 480 = 370 g

1 mark
Jar: 370 g.

..... g

(Total for Question 14 is 3 marks)
