21 The scatter graph shows the age and the value of each of ten cars of the same make and model.

1 mark
Single line of best fit.

(a) Describe the relationship between the value of a car and the age of the car.

As age increases, the car's value tends to decrease.

1 mark
Negative correlation.

(1)

(b) Draw a line of best fit on the scatter graph.

(1)

It may not be reliable to use the line of best fit to predict the value of a car that is 10 years old.

(c) Give a reason why.

10 years is outside the observed age range 1 to 7 years.

Extrapolating may not follow the same trend.

1 mark
Outside the data range.

(1)

(Total for Question 21 is 3 marks)
