27 6 boys have a mean age of 10 years.
14 girls have a mean age of 5 years.

Work out the mean age of all 20 children.

Boys total = 6 × 10 = 60 years

Girls total = 14 × 5 = 70 years

Mean = (60 + 70) ÷ 20 = 6.5 years

1 mark
Convert means to totals.

1 mark
Add totals; divide by 20.

1 mark
6.5 years.

.....

(Total for Question 27 is 3 marks)
