12 Work out the value of $\frac{\sqrt{7}+5}{3} \times \frac{\sqrt{7}-5}{3}$

Give your answer in its simplest form.

$$\frac{(\sqrt{7}+5)(\sqrt{7}-5)}{9}$$

$$= \frac{7-25}{9}$$

1 mark
Expand numerator.

1 mark
$\sqrt{7} \times \sqrt{7} = 7$.

$$= -18 \div 9 = -2$$

1 mark
−2.

(Total for Question 12 is 3 marks)
