3 There are 270 students in Year 7
Each student studies one of French or German or Spanish.

Of these 270 students

$\frac{2}{9}$ study French

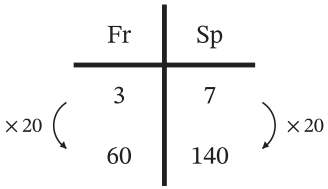

the number who study French : the number who study Spanish = 3 : 7

42 boys study German

Of the students who study German, what percentage are boys?
You must show your working.

French = 270 ÷ 9 × 2 = 60

1 mark
Find French.

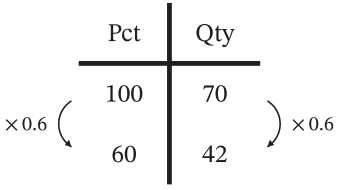

1 mark
Spanish = 140.

German = 270 – 60 – 140 = 70

1 mark
Subtract both groups.

1 mark
Scale 70 to 100%.

42 of 70 = 60%

60% of the German students are boys.

1 mark
60%.

.....%

(Total for Question 3 is 5 marks)
