15 (a) Write one pair of brackets in this calculation so that the answer is correct.

$$5 + 2 \times 7 - 4 = 11$$

$5 + 2 \times (7 - 4) = 5 + 6 = 11$

1 mark
Subtract first.

(1)

(b) Work out the value of $5x^3$ when $x = 2$

$5 \times 2^3 = 5 \times 8 = 40$

1 mark
Cube 2,
then multiply by 5.

.....

(1)

(Total for Question 15 is 2 marks)
