19 $T = \dfrac{m}{f}$

m = 120 correct to 3 significant figures

f = 25.6 correct to 1 decimal place

By considering bounds, work out the value of T to a suitable degree of accuracy.
Give a reason for your answer.
You must show all your working.

$119.5 \leq m < 120.5$

1 mark
Half a rounding unit.

$25.55 \leq f < 25.65$

Lower limiting value: $\dfrac{119.5}{25.65}$

1 mark
Small numerator; large denominator.

$= 4.658869396...$

Upper limiting value: $\dfrac{120.5}{25.55}$

1 mark
Correct two limits.

$= 4.716242661...$

Both limits round to 4.7 (1 d.p.), so use T = 4.7.

1 mark
Both give 4.7.

.....

(Total for Question 19 is 4 marks)
