5 The table gives information about the length of each of 90 sticks.

Length (b cm)	Frequency
$0 < b \leqslant 8$	5
$8 < b \leqslant 16$	20
$16 < b \leqslant 24$	45
$24 < b \leqslant 32$	20

Jenny drew the frequency polygon below for the information in the table.
The frequency polygon is **not** correct.

Write down **two** things that are wrong with the frequency polygon.

1 ..... *The first and last points should not be joined.* **1 mark** Open at both ends .....

.....

2 ..... *The last point should be (28, 20), not (32, 20).* **1 mark** Use class midpoint .....

.....

(Total for Question 5 is 2 marks)
