11 Solve $\frac{8-3x}{4} = 8-2x$

$8 - 3x = 4(8 - 2x)$

$8 - 3x = 32 - 8x$

$8 + 5x = 32$

$5x = 24$

$x = 24 \div 5 = 4.8$

1 mark
Multiply both by 4.

1 mark
Collect x terms.

1 mark
x = 4.8.

$x =$.....

(Total for Question 11 is 3 marks)
