19

The incomplete histogram shows information about the weights of 100 babies.
All 100 babies have a weight between 1 kg and 5 kg.

6 of the babies have a weight between 1 kg and 2.5 kg.

Complete the histogram.
You must show all your working.

Frequency = class width × frequency density.

1 mark
Use rectangle area.

2.5–3 kg: 0.5 × 40 = 20 babies

3.5–4 kg: 0.5 × 60 = 30 babies

1 mark
Find 20, 30 and 12.

4–5 kg: 1 × 12 = 12 babies

Missing frequency = 100 – 6 – 20 – 30 – 12 = 32

1 mark
Subtract from 100.

Missing density = 32 ÷ 0.5 = 64

1 mark
Draw height 64.

(Total for Question 19 is 4 marks)
