2 *ABC* and *PQR* are similar triangles.

$AB : PQ = 2 : 5$

(i) Work out the length of *PQ*.

Scale factor = 5 ÷ 2 = 2.5

Scale	AB PQ	BC QR
2	9	7.2
×2.5	×2.5	×2.5
5	22.5	18

PQ = 9 × 2.5

= 22.5 cm

1 mark
Scale factor 2.5.

1 mark
22.5 cm.

..... cm

(2)

(ii) Work out the length of *BC*.

BC = 18 ÷ 2.5 = 7.2 cm

1 mark
Reverse the scale.

1 mark
7.2 cm.

..... cm

(2)

(Total for Question 2 is 4 marks)
