8 (a) Which distance is shorter, 0.8 km or $\frac{3}{4}$ km?

You must show how you get your answer.

$\frac{3}{4}$ km = 0.75 km

1 mark
Use the same units.

0.75 < 0.8, so ¾ km is shorter.

1 mark
Comparable values and correct distance.

(2)

Saira's height is 1.4 m.
Imran's height is 115 cm.

Saira's height is greater than Imran's height.

(b) How much greater?

1.4 m = 140 cm

1 mark
Convert metres to cm.

140 – 115 = 25 cm

1 mark
Include units.

.....

(2)

(Total for Question 8 is 4 marks)
