9 The table gives information about the number of goals scored in each game by a school football team.

Number of goals	Frequency
0	2
1	3
2	2
3	5
4	2

Sharon says,

"The mode of the number of goals scored is 2 because 2 occurs most often in the table."

(a) Is Sharon correct?
Give a reason for your answer.

No. The mode is 3 goals, because 3 goals occurred in 5 games, the highest frequency.

1 mark
Mode is the value, not the frequency.

(1)

(b) Work out the total number of goals scored by the team.

Total goals = 0 × 2 + 1 × 3 + 2 × 2 + 3 × 5 + 4 × 2

= 0 + 3 + 4 + 15 + 8

= 30 goals

1 mark
Value × frequency.

1 mark
Add all products.

(2)

(Total for Question 9 is 3 marks)
