13 Write down an example to show that each of the following three statements is **not** correct.

(a) The sum of two odd numbers is always odd.

$3 + 5 = 8$ (even)

1 mark
Two odd numbers; even sum.

(1)

(b) The product of two prime numbers is always odd.

$2 \times 3 = 6$ (even)

1 mark
Both factors are prime.

(1)

(c) The square of a number is always bigger than the number.

$1^2 = 1$ (equal, not bigger)

1 mark
One counterexample is enough.

(1)

(Total for Question 13 is 3 marks)
