2 Nik owns a stationery shop.
She bought 72 pencils for a total cost of £4.68

Nik sells all 72 pencils for 15p each.

Work out Nik's percentage profit.
Give your answer correct to 1 decimal place.

Selling price = 72 × £0.15 = £10.80

1 mark
Same number of pencils.

Profit = £10.80 − £4.68 = £6.12

1 mark
Find profit.

Percentage profit = $\frac{6.12}{4.68} \times 100$

1 mark
Compare profit with the original cost.

= 130.7692307...%

= 130.8% to 1 decimal place

1 mark
130.8%.

.....%

(Total for Question 2 is 4 marks)
