10 Jim has a dog.

Jim buys 6 bags of dog biscuits.
There are 27 biscuits in each bag of dog biscuits.

Jim's dog eats 5 dog biscuits each day.

Has Jim bought enough dog biscuits for 4 weeks?
You must show how you get your answer.

Bought: 6 × 27 = 162 biscuits

1 mark
Find biscuits bought.

4 weeks = 4 × 7 = 28 days

Needed: 28 × 5 = 140 biscuits

1 mark
Compare the same units: biscuits in four weeks.

162 > 140, so YES, enough.

1 mark
State yes with 162 compared to 140.

(Total for Question 10 is 3 marks)
