16 $t = 10$
$w = 6$

(a) Work out the value of $2t - 3w$

$2 \times 10 - 3 \times 6 = 20 - 18 = 2$

2 marks total
Substitute both values before calculating.

2

(2)

(b) Simplify $5m + 3p + m - 2p$

$(5m + m) + (3p - 2p) = 6m + p$

2 marks total
Collect like terms.

$6m + p$

(2)

(Total for Question 16 is 4 marks)
