10 (a) Write down a suitable metric unit for measuring the length of a pencil.

1 mark
Centimetres are suitable for a pencil.

cm

(1)

The price of each pencil in a shop is the same.
The price of 5 pencils in the shop is 85p.

Tyler spends £2.04 on pencils.

(b) How many pencils does Tyler buy?

One pencil: 85p ÷ 5 = 17p

£2.04 = 204p; 204 ÷ 17 = 12

2 marks total
Find unit price; divide the money in the same units.
