12 A total of 275 people took a driving theory test on Monday.
Of these people, 68% passed the test.

(a) (i) What percentage of people who took the test on Monday did **not** pass the test?

100% − 68% = 32%

1 mark
Complement to 100%.

32 %

(1)

(ii) How many of the 275 people who took the test on Monday passed the test?

275 × 0.68 = 187

2 marks total
Multiply the total by 68/100.

187

(2)

On Wednesday, a total of 90 people took a practical driving test.
Of these people, 72 passed the test.

(b) Write as a ratio the number of people who passed the practical test to the number of people who did **not** pass the practical test.
Give your ratio in its simplest form.

Did not pass = 90 − 72 = 18

Passed : did not pass = 72 : 18

Divide both parts by 18: 4 : 1

2 marks total
Compare passes with failures; simplify both parts.

4 : 1

(2)

(Total for Question 12 is 5 marks)
