18 Macie is going to cover a rectangular wall with tiles.

Tiles are sold in boxes.
Each box of tiles will cover $0.8\,m^2$
Each box of tiles costs £19.95

Macie can only buy whole boxes of these tiles.

Work out the total cost of the boxes of tiles Macie needs to buy.

Wall area = 4.6 × 2.4 = 11.04 m^2

1 mark
Area of rectangle = length × width.

Boxes = 11.04 ÷ 0.8 = 13.8

1 mark
Divide by area covered per box.

Buy 14 whole boxes.

Cost = 14 × £19.95 = £279.30

2 marks total
Round up to whole boxes before finding cost.

£ 279.30

(Total for Question 18 is 4 marks)
