6 (a) Find $\sqrt{46.24}$

$6.8 \times 6.8 = 46.24$

1 mark
Use the positive square root.

6.8

(1)

Here is a list of numbers.

3 5 9 16 25 84 125

Keerat is asked to choose a cube number from the list.
He says

"5 cubed is 125 so 5 is a cube number."

Keerat is wrong.

(b) Explain why.

125 is the cube number: $5 \times 5 \times 5 = 125$.

5 is the number being cubed; 5 is not a cube number.

1 mark
A cube number is the result of cubing a whole number.

(1)

(Total for Question 6 is 2 marks)
