9 Alicia has 8 cards.
Each card has a letter on it and the letters spell out the word **PARALLEL**.

P	A	R	A	L	L	E	L

Alicia takes at random one of the cards.

(a) (i) Which letter is **most** likely to be on the card Alicia takes?

1 mark
L appears three times, the most.

L

(1)

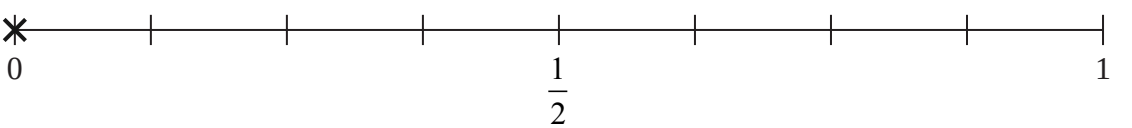

(ii) Find the probability that **E** is the letter on the card Alicia takes.

1 mark
One E out of eight cards.

$\frac{1}{8}$

(1)

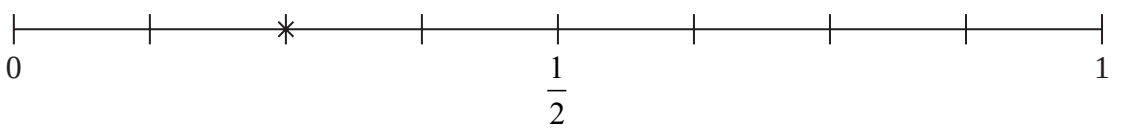

(b) On the probability scale below, mark with a cross (×) the probability that **S** is the letter on the card Alicia takes.

1 mark
No S cards, so probability 0.

(1)

Here is a probability scale.
The cross (×) shows the probability of the letter on the card Alicia takes.

(c) Write down the letter on the card Alicia takes.

Marked probability = 2/8; A appears twice.

A

1 mark
Match the count to the marked probability.

(1)

(Total for Question 9 is 4 marks)
