28 *ABC* is a right-angled triangle.

Work out the length of *AB*.
Give your answer correct to 1 decimal place.

tan 43° = opposite ÷ adjacent = AB ÷ 3.9

AB = 3.9 × tan 43° = 3.636808836... cm

AB = 3.6 cm (1 d.p.)

2 marks total
Use tangent for the opposite and adjacent sides.

3.6 cm

(Total for Question 28 is 2 marks)
