15 Here is a method to make fizzy drink.

> Mix 120 m*l* of orange juice
> with 500 m*l* of lemonade

Shazia uses 2 litres of lemonade to make fizzy drink.

How many millilitres of fizzy drink does she make using this method?

2 litres = 2000 ml

1 mark
Convert litres to ml.

500 ml lemonade → 120 ml orange juice

÷500: 1 ml lemonade → 0.24 ml orange juice

×2000: 2000 ml lemonade → 480 ml orange juice

Total drink = 2000 + 480 = 2480 ml

1 mark
The scale factor is 2000 ÷ 500 = 4.

2 marks total
Include BOTH liquids in the final volume.

2480 ml

(Total for Question 15 is 4 marks)
