29 Andy travels to work by car using the same route each day.

Yesterday, Andy travelled to work at an average speed of 30 miles per hour for 40 minutes.
Today, Andy travelled to work at an average speed of 25 miles per hour.

How long did it take Andy to travel to work today?
Give your answer in minutes.

40 minutes = 40/60 hours

Yesterday: distance = 30 × 40/60 = 20 miles

1 mark
Use hours with miles per hour.

Today: time = 20 ÷ 25 = 0.8 hours

1 mark
The route has the same distance today.

0.8 × 60 = 48 minutes

1 mark
Convert the time back to minutes.

48 ..... minutes

(Total for Question 29 is 3 marks)
