11 (a) Estimate the value of $\sqrt{2400}$

2400 is close to 2500 = 50^2

$\sqrt{2400} \approx \sqrt{2500} = 50$

1 mark
Use a nearby square number.

50

(1)

(b) Is your answer to part (a) an underestimate or an overestimate?
You must give a reason for your answer.

Overestimate, because 2500 > 2400.

Taking square roots preserves this order: 50 > $\sqrt{2400}$.

1 mark
Link the decision to the square number used.
