11 Tom is going to the ice rink.

It takes him 25 minutes to get from his home to the ice rink.
It takes him 25 minutes to get from the ice rink to his home.

Tom leaves his home at 2 40 pm.
He has to get back home by 6 pm.

What is the greatest length of time Tom can stay at the ice rink?
Give your answer in minutes.

2:40 pm → 3:00 pm → 6:00 pm

20 min + 180 min = 200 min

2 marks total
Find the full time interval and express it in minutes.

Travel takes 25 + 25 = 50 minutes

1 mark
Allow time for BOTH journeys.

Time at rink = 200 – 50 = 150 minutes

1 mark
Latest return departure is 5:35 pm; arrival is 3:05 pm.

..... 150 ..... minutes

(Total for Question 11 is 4 marks)
