15 The ratio of the cost of 1 kg of oranges to the cost of 1 kg of apples is 5 : 2

Complete the table.

	2 kg	6 kg	8 kg	9 kg
oranges	£10	£30	£40	£45
apples	£4	£12	£16	£18

Oranges: 2 kg → £10, so 1 kg → £5

1 mark
Scale by mass.

Apples: £5 ÷ 5 × 2 = £2 per kg

2 marks total
Use £2 per kg for the apple row; complete every cell.

(Total for Question 15 is 3 marks)
