9 You can use this graph to change between gallons and litres.

(a) (i) Use the graph to change 15 gallons to litres.

1 mark
Up from 15 gallons; read about 68 litres.

68 litres
(1)

(ii) Use the graph to change 110 litres to gallons.

1 mark
Across from 110 litres; read about 24.2 gallons.

24.2 gallons
(1)

One gallon of water weighs 4.6 kg.

(b) How much does 150 litres of water weigh?
You must show all your working.

50 litres ≈ 11 gallons, so 150 litres ≈ 33 gallons.

33 × 4.6 = 151.8 kg

3 marks total
Read a third of the volume, scale up, then multiply by kg/gallon.

151.8 kg
(3)

(Total for Question 9 is 5 marks)
