17 The graph of $y = f(x)$ is shown on the grid.

Graph **A** is a translation of the graph of $y = f(x)$

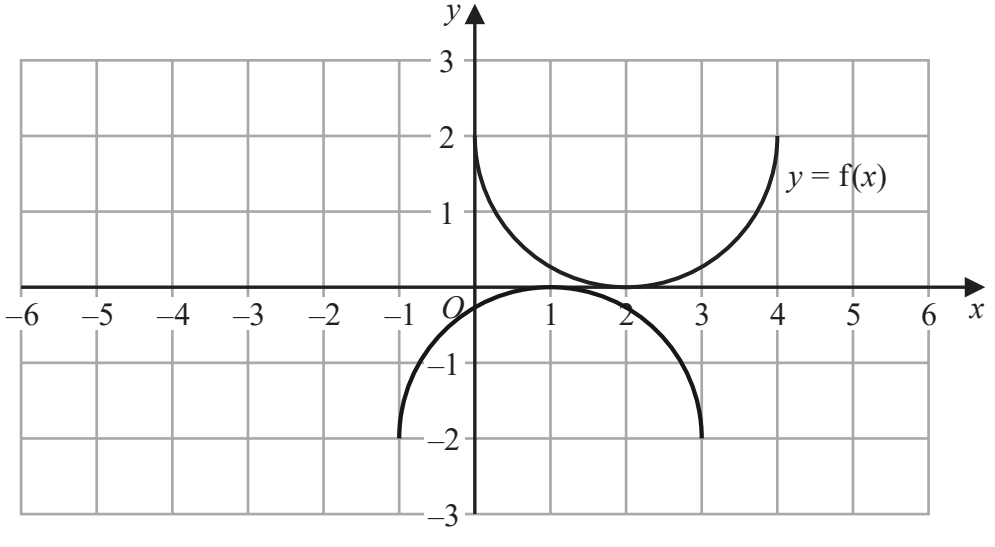

(a) Write down the equation of graph **A**.

Graph A is 3 units down: y = f(x) – 3.

1 mark
Move down by 3 units.

(1)

The graph of $y = f(x)$ is shown on the grid.

(b) On the grid above, sketch the graph of $y = -f(x + 1)$

(2)

(Total for Question 17 is 3 marks)

f(x + 1): move 1 left. Then −f: reflect in the x-axis.
Key points become (−1, −2), (1, 0), (3, −2).

2 marks total
Same curve shape, correctly translated and reflected.
