5 In a sale, the normal price of a jacket is reduced by 15%
The normal price of the jacket is reduced by £19.50

Work out the normal price of the jacket.

15% = £19.50; 1% = £19.50 ÷ 15 = £1.30

100% = £1.30 × 100 = £130

1 mark
The reduction is 15% of the original price.

1 mark
Scale from 15% to 100%.

£ 130

(Total for Question 5 is 2 marks)
