6 The diagram shows a triangular prism.

The total surface area of the prism is 600 cm^2

Work out the volume of the prism.

Triangular end area = ½ × 15 × 8 = 60 cm^2

1 mark
Find an end area.

Let the prism length be l cm.

Surface area = 2 × 60 + (8 + 15 + 17)l

120 + 40l = 600

1 mark
Both ends and all three rectangular faces.

40l = 480, so l = 12 cm

1 mark
Solve for length.

Volume = end area × length = 60 × 12

1 mark
Use area × length.

Volume = 720 cm^3

1 mark
Use cubic units.

720 ..... cm^3

(Total for Question 6 is 5 marks)
