DO NOT WRITE IN THIS AREA

9 Fred carries out a survey of 120 people.

50% of the people say they eat meat.
10% of the people say they are vegan.
The rest of the people say they are vegetarian.

Work out the number of people who say they are vegetarian.

Vegetarian: 100% – 50% – 10% = 40%

1 mark
Use the remaining percentage.

120 ÷ 100 × 40 = 48 people

2 marks total
Apply 40% to the full survey of 120 people.

48

(Total for Question 9 is 3 marks)
